**Exterior Wall Panels**

Fiber Reinforced Plastic (FRP) is the most designer-friendly exterior facade material, providing unlimited shaping possibilities, consolidation of multiple parts, and significant cost reductions for installation and long term maintenance.

- Computer Aided Design
- Resin Transfer Molding
- Automotive Grade Finish
- Engineered Installation Kits

### Unlimited design possibilities:

- Complex, compound, curved parts
- 3D shapes, logos, branded images
- Seamless attachments (no visible rivets or bolts)
- 100% color match TO ANY branded corporate colors
- 10 year limited no-fade warranty

### Lower installation and maintenance costs:

- Each RTM mold reproduces 100% identical FRP parts
- RTM allows for integration of several aluminum parts into one FRP part
- User-friendly site installation kits with standard attachments
- FRP is highly durable and can be repaired ON SITE to 100% of original condition
